## DETAILED ACTION

This office action is in response to the amendment filed May 23, 2005. In accordance with the amendment, claims 1-4, 7, 9, and 16 have been amended. Claims 1-16 are pending.

### *Allowable Subject Matter*

1. Claims 1-16 are allowed. The following is an examiner's statement of reasons for allowance: the relevant prior art of record does not teach or reasonably suggest the specific method limitations c), d), and e), in which the first and second pump wavelengths are predetermined, the amplified signal is tapped, and the detection of a *total amplified* signal power occurs. (method claims 1-6). The relevant prior art of record also does not teach or reasonably suggest that the optical power monitor is *at the output of the amplifier* for measuring optical power of the amplified signals which changes as a result of changes in channel loading. (apparatus claims 7-16). Applicant's arguments (with clarifying amendment) filed May 23, 2005 are persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
